

**Swami Ramanand Teerth
Marathwada University, Nanded.**

*Revised Curriculum
B. Sc. Third year
(Semester V & VI)
Environmental Science*

W.e.f. : June, 2011.
Semester program for
B. Sc. III Year Environmental Science

| Semester Fifth | | | | Semester Sixth | | | | Annual Practical | | Total marks of the Year |
|----------------------------|-------------------------------|-----------------------------|---------------------|----------------------------|-------------------------------|-----------------------------|---------------------|----------------------------|-------------|-------------------------|
| Paper Code | Total Marks for Theory Papers | External Theory Examination | Internal Assessment | Paper Code | Total Marks for Theory Papers | External Theory Examination | Internal Assessment | Paper Code | Total Marks | |
| Env. 301 | 50 | 40 | 10 | Env. 304 | 50 | 40 | 10 | Env. 307 | 50 | 300 |
| Env. 302 OR Env. 303 | 50 | 40 | 10 | Env. 305 OR Env. 306 | 50 | 40 | 10 | Env. 308 OR Env. 309 | 50 | |

- External 40 marks are splitted in to 15 marks Multiple choice questions and 25 marks Subjective questions for each paper
- Internal 10 marks are splitted in to 05 marks for home assignment and 05 marks for the mid term examination
- Work load for theory papers Env. 301, Env. 302, Env. 303, & Env. 304 is 03 periods per week.
- Paper Env. 305 & Env. 306 (Laboratory courses) are annual and having work load 03 periods per week.

Course Structure & Marking System
B. Sc. III year (Semester V) Environmental Science

| Sr. No. | Course Code | Title of the Paper | No. Of Periods Per Week | Total No. of Periods In the Semester | Internal Assessment | | External Examination | Total marks |
|---------|----------------------------|--|-------------------------|--------------------------------------|---------------------|---------------|----------------------|-------------|
| | | | | | Home Assignment | Mid Term Exam | | |
| 01 | Env. 301 | Waste water Analysis | 03 | 45 | 05 | 05 | 40 | 50 |
| 02 | Env. 302 OR Env. 303 | Environmental Instrumentation - I OR Environmental Education | 03 | 45 | 05 | 05 | 40 | 50 |

Course Structure & Marking System
B. Sc. III year (Semester VI) Environmental Science

| Sr. No. | Course Code | Title of the Paper | No. Of Periods Per Week | Total No. of Periods In the Semester | Internal Assessment | | External Examination | Total marks |
|---------|----------------------------------|--|-------------------------|--------------------------------------|---------------------|---------------|----------------------|-------------|
| | | | | | Home Assignment | Mid Term Exam | | |
| 01 | Env. 304 | Waste water Engineering | 03 | 45 | 05 | 05 | 40 | 50 |
| 02 | Env. 305 | Environmental Instrumentation – II | 03 | 45 | 05 | 05 | 40 | 50 |
| 03 | OR Env. 306 | OR Environmental Management | | | | | | |
| 04 | Env. 307 | Laboratory Course | 03 | 60 | --- | --- | 50 | 50 |
| 05 | Env. 308 OR Env. 309 | Laboratory Course OR Laboratory Course | 03 | 60 | --- | --- | 50 | 50 |

ENV. 301: Waste water Analysis

Unit I : Introduction and quality of sewage :

Introduction : Purpose of sanitation; Principles of sanitation; Sanitary projects; Site for sewage treatment works; Sewerage systems : separate system, combined system, partially separate system (05)

Quality of sewage : Physical properties: Colour, Odour, Turbidity, Temperature, Solids; Chemical properties: Hydrogen ion concentration, Dissolved oxygen, Dissolved carbon di oxide, Chlorides, Hardness, Nitrogenous wastes, Bio chemical oxygen demand, Chemical oxygen demand; Biological characteristics: Bacteria, Fungi, Rotifers, Protozoa, Crustaceans, Viruses, Population equivalent (10)

Unit II : Analysis of sewage & Natural Methods of sewage disposal:

Physical tests : Color, Odor, Temperature, Turbidity; Chemical tests : Chlorine, Oil & Grease, Nitrogen, Oxygen, Hydrogen ion concentration (pH), Total Solids; Bacteriological tests : MPN, IMVIC, Population equivalent. (10)

Disposal by dilution, Self purification of natural waters, Disposal by land treatment, Sewage as fertilizer; Methods of applying sewage: Basin method, Flooding method, furrow method, managed turf method, Zig Zag method. (10)

Unit III : Sewage Pumps :

Necessity of pumps, Pumping of sewage, Pumping stations, Requirements of pumping stations, Types of sewage pumps: Centrifugal pumps, Reciprocating pumps, Propeller pumps, Air pressure pumps; Power for pumps (10)

15. **A Manual on Water and Waste Water Analysis** : National Environmental Engineering Research Institute, Nagpur

ENV. 302: Environmental Instrumentation - I

Unit I : Introduction :

Classification of Instrumental methods, Types of errors : Determinate errors, Indeterminate errors, Precision and accuracy, Methods of expressing accuracy : Absolute errors, Relative errors. (05)

Unit II : Nephelometry, Turbidometry Measurement of pH, Redox potential and conductivity :

Nephelometry & Turbidometry : Introduction, Theory, Factors affecting measurement, Turbidometers, Nephelometers, Applications of Turbidometry and Nephelometry in Environmental studies (10)

pH and Redox potential measurement : Introduction, pH indicator method, potentiometry method, Types of electrodes, advantages and disadvantages, applications of pH meter. (08)

Conductivity measurement : Introduction, Definitions of various terms, Conductance measurement, Methods of conductance measurement, applications of conductivity measurement. (07)

Unit III : Chromatography :

Principles, Methods and applications of Thin Layer Chromatography (TLC): working and applications; Column chromatography: working and applications; Gas chromatography (GC): working and applications; High performance liquid chromatography (HPLC) : working and applications; Gas-liquid chromatography (GLC): working and applications; Ion exchange chromatography: working and applications. (15)

ENV. 303 : Environmental Education

Unit I : Introduction :

Environment, Ecology, Environmental Science, Environmental education, Goals and objectives of Environmental education, Principles of Environmental education, Role of green teacher in Environmental education. (05)

Unit II : Environmental education :

Indoor Environmental education : Environmental education through language, News papers, Art, Projects, T.V., Games, Establishment of nature club

Out door Environmental education : Nature trails, Nature camps, celebration of Environmental days.

Environmental education in India : Formal Environmental education, Environmental education at higher secondary stage, Environmental education at college, Non formal Environmental education. (20)

Unit III : Natural Resources :

Conventional Energy resources : Coal, Petroleum and natural gas, Nuclear energy, Geothermal energy, Management of Conventional Energy resources.

Non Conventional Energy resources : Solar energy, Hydro energy, Tidal energy, Biomass energy, Wind energy, management of non Conventional Energy resources.

Forest resources : Uses of forest resources, wood products, wood consumption, wood demand, Non wood products, trade of forest products, deforestation, Afforestation, Social forestry, Forest management, National forest policy.

Wild life resources : Wild life and Environment, endangered species, causes of depletion of wild life, wild life trade, wild life management. (20)

ENV. 304 : Waste Water Engineering

Unit I : Primary treatment of sewage :

Screens; Grit chambers; Detritus tank, Skimming tank; Sedimentation: Plain sedimentation tank, Primary clarifiers, Secondary clarifiers, Coagulation of sewage. (12)

Unit II : Aerobic and Anaerobic treatment of sewage :

Aerobic Treatment : Activated sludge process: Action of activated sludge, aeration tank, Step aeration, Tapered aeration, extended aeration, Advantages of activated sludge process, Disadvantages of activated sludge process; Trickling filters: Standard rate trickling filters, High capacity trickling filters.; Oxidation ponds: Action, Construction, Design aspects, Advantages, Disadvantages, Uses. (12)

Anaerobic treatment : Septic tank; Imhoff tank; Sludge digestion tank; Bio gas; (08)

Unit III : Tertiary treatment and Solid waste disposal :

Chlorination; Garbage collection and removal; Garbage disposal : Controlled tipping, disposal in to sea, filling of low lying areas, incineration, mechanical compost plant, pulverization, trenching; Night soil collection and disposal (13)

ENV. 305 : Environmental Instrumentation - II

Unit I : Colorimetry and Fluoride meter :

Colorimetry : Theory, Lambert's law, Beer's Law, Working of Colorimetry, Applications.

Fluoride meter : Principle of operation, Salient features, Working Applications. (10)

Unit II : Spectrophotometry :

Principle and Operation of Spectrophotometer, Ultra Violet (UV) Spectrophotometer: working and applications; Infra Red (IR) Spectrophotometer: working and applications, Nuclear Magnetic Resonance (NMR): working and applications; Atomic Absorption Spectrophotometer (AAS): working, applications and its importance; Flame Photometer: working and applications; Fluoride meter : utility and significance. (20)

Unit III : Flame Photometry :

Introduction, Principle, Instrumentation, Applications of flame photometry in environmental analysis (15)

ENV. 306 : Environmental Management

Unit IV : Environmental Management :

Principles of Environmental Management : Introduction, Evolution of Environmental Management, Basic principles of Environmental Management, Business charter of International chamber of commerce for sustainable development, Polluter pays principles.

Frame work for Environmental Management : Introduction, Checklist for environmental issues, Role of Environmental Management in the industry

Waste minimization and pollution prevention : Waste generating operations, Basics of the waste minimization, Careful operating procedures, Raw material changes, Manufacturing process changes, Equipment changes, Finished product changes, recycling of matter and energy (20)

Unit V : Environmental Impact Assessment and Remote sensing :

EIA : EIA process, preparation of EIA statement, Cost benefit analysis, current status of EIA, Projects covered by EIA, Environmental audit. EMS ISO 14000.

Remote sensing : Remote sensing tools in environmental management, applications of remote sensing in oceanography, meteorology, wet land mapping, forest management, exploration of under ground water. (13)

Unit VI : Environmental legislation :

Salient features of the Motor vehicle act 1988, Water prevention and control of pollution act 1974, Water prevention and control of pollution act 1977, Environmental protection act 1986, Wild life protection act 1972. (13)

|-------------------------------------|
| ENV. 307 : Laboratory Course |
|-------------------------------------|

01. Study of sewage sampling Equipments.
02. Methods of sample collection.
03. Preservation of sewage samples.
04. Determination of Color of sewage sample.
05. Determination of pH of provided sewage sample.
06. Determination of Turbidity of provided sewage sample by turbidity meter method.
07. Determination of Total solids from the sewage sample.
08. Determination of Total dissolved solids from the sewage sample.
09. Determination of Volatile solids from sewage sample.
10. Determination of Conductivity of sewage sample.
11. Determination of Chlorides from provided sewage sample.
12. Determination of dissolved oxygen from sewage sample.
13. Determination of Carbon di oxide from sewage sample.
14. Determination of Oil & Grease from Sewage sample.
15. Determination of silica.
16. Determination of Ammonia from sewage sample.
17. Determination of Nitrates from sewage sample.
18. Estimation of hydrogen Sulphide from the wastewater.
19. Estimation of Biochemical oxygen demand of wastewater.
20. Estimation of Chemical oxygen demand waste water.

14. Colorimeter (Estimation of Ferrous)
15. Spectrophotometer (Estimation of Phosphate)
16. Spectrophotometer (Estimation of Sulphate)
17. Flame photometer (Estimation of Sodium)
18. Flame photometer (Estimation of Calcium)
19. Flame photometer (Estimation of Lithium)
20. Submission of Excursion Report

ENV. 309 : Laboratory Course

01. Determination of wind speed by anemometer.
02. Analysis of bleaching powder.
03. Analysis of Alum.
04. Analysis of activated carbon.
05. Determination of Detergents.
06. Activated sludge Studies.
07. Analysis of Bleaching Powder.
08. Estimation of Lime.
09. Determination of optimum coagulant dose by Jar test apparatus.
10. Estimation of chlorine dose for disinfection of sewage.
11. Determination of sludge volume index of a sludge sample.
12. Determination of sludge density index of sludge sample.
13. Determination of alum dosage for Defluoridation of water by Nalgonda process.
14. Determination of organic matter from soil by Walk ley's black method.
15. Determination of sewage and wastewater strength.
16. Estimation of hydrogen Sulphide from the wastewater.
17. Preparation of Air quality Impact Assessment Check list.
18. Preparation of Water quality Impact assessment Check list.
19. Preparation of Noise Impact assessment Check list.
20. Study of relative stability of organic effluent's.
